TRAITS

My dedication, combined with a willingness to tackle challenges, has resulted in a diverse skill set, including language, coding, 3D modeling, translation, and product design.

I enjoy reading literature in English, Japanese, and Mandarin, so language especially is a personal and important topic for me. This continues to reinforce my passion for writing and translating regarding a variety of topics. Therefore making me conscious of how I use language, which honed my communication skills, allowing me to connect effectively with others.
